

Scheduler::getSystemMemoryInfo

Scheduler::getTaskMemoryInfo

Task::getTaskStructSize

```
graph LR; A[Scheduler::getSystemMemoryInfo] --> C[Task::getTaskStructSize]; B[Scheduler::getTaskMemoryInfo] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes with black borders contain the text 'Scheduler::getSystemMemoryInfo' (top) and 'Scheduler::getTaskMemoryInfo' (bottom). On the right, a gray rectangular box with a black border contains the text 'Task::getTaskStructSize'. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box, indicating that both Scheduler methods depend on or call the Task method.
